

ELECTRICAL SYSTEM

Should be continuity

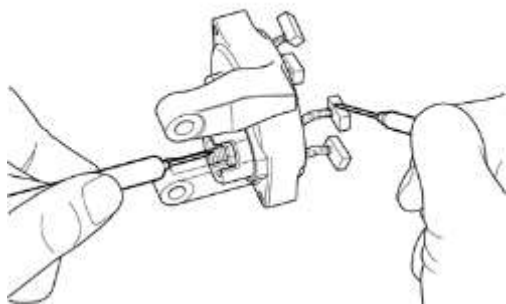

- Between pair of commutator bars
– There should be continuity.

Should be no continuity

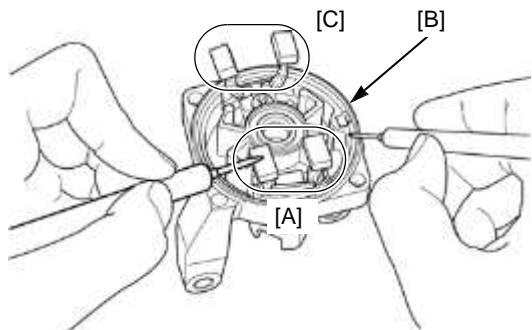

- Between each individual commutator bar and the armature shaft
– There should be no continuity.

Should be continuity

- Between the positive brush and cable terminal.
– There should be continuity.

Should be no continuity

- Between the positive brush [A] and rear cover [B].
– There should be no continuity.
- Between the positive brushes and negative brushes [C].
– There should be no continuity.
