

MCS INFORMATION

Honda Motorcycle Communication System (MCS) is designed for use by trained technician to diagnose and repair motorcycle electronic systems.

MCS is used for troubleshooting of PGM-FI, ABS, DCT (Dual Clutch Transmission) and several electronic systems that have a Data Link Connector (DLC).

MCS contains various features and information as follows. Technician can perform the diagnosis with MCS according to each DTC.

Functions	Features
Diagnosis & Measurement	<ul style="list-style-type: none">• Quick Doctor• DTC & Freeze Data• Data List• Data View
Maintenance	<ul style="list-style-type: none">• ECM Update• ECM Reset• Inspection
Service Info	<ul style="list-style-type: none">• DLC location search and display• Web Link (it depends on country)
Unit Info	<ul style="list-style-type: none">• Connected vehicle information display
